CLINICAL SKILLS

The current clinical practice embraces all aspects of non-invasive Cardiology.

The two main areas of interest are Clinical Cardiology and Echocardiography.

Future goal to master all modalities of cardiovascular imaging including cardiac magnetic resonance, computed tomography and nuclear cardiology.

Although Pacing experience was over than expected during fellowship, there is no current clinical activity in that area other than emergency temporary transvenous pacing. As a non-interventional Cardiologist experience in other invasive techniques like cardiac catheterization and Electrophysiology is limited to the expected during fellowship.

PUBLICATIONS AND SCIENTIFIC ACTIVITY

- Scientific papers: [link](#)
- Presentations at medical meetings: [link](#)
- Books: Author of one chapter in "Manual de Urgências e Emergências". Author of one chapter in "Hipertensão resistente na prática clínica".
- Clinical trials: [link](#)
- Continuing medical education: [link](#)
